

## Hand Free Mirror Fan

Thank you for choosing our products.

Please read this instruction manual carefully before use.

### Fan's safty assurance and special design

1. Safety Design For PCB Protection: Use individual charging protection circuit, protect from over-charged, over-discharged, over-current and short circuit. Assure service life and safety.
2. Safety Design For Input and Charging: Use individual management integrated circuits and constant-current charging Design, assure safety and anti-explosion, extend battery life.
3. Safety Design For Output: Use fixed frequency DC-DC to protect motor from being damaged and assure service life.
4. The unique design of low current and high speed motor, Service time is much longer and operation is more stab.
5. Motor lock protection prevents the motor from burning out when locked.

### Packing List

Fan, Hand Strap, USB Cable, Instruction Manual.

### Product parameters

Name of the product	HandFan Hand Free Mirror Fan
Model Name	PS-250
Speed Mode	3Shift
Output power(MAX)	2W
Input	DC 5V/1A
Battery Specification	Li-ion 18650-3.7V 1500mAh
Working Time(h)	Hi Speed 4h ~ Low Speed 11h
Charge Time(h)	3h
Size	81.5x78x54.5mm
Weight	138g

### How to use

1. When charging, please use DC 5V adapter to charge this product.
2. Support charging and discharging on the same time.
3. Press power button to start fan, Blue indicator light on.
4. Press power button to change different wind speed.
5. For protecting battery life and ensuring battery quickly charging saturated, the fan only support the low wind speed while charging.

First press power button	low wind speed
Second press power button	middle wind speed
Third press power button	high wind speed
Forth press power button	power off

### Indicator status description

● Light ON / ◉ Light Flashing / ○ Light OFF		
Charging Indicate	◉	Red falshing in charging
	●	On red full charged
Working Light	●	Blue

### Mirror-opening instruction

Turn round \*OPEN\* to use mirrow

## Structure Description

### **⚠ WARNING**

1. Don't put fingers into the fan.
2. The lithium battery is without memory function. Charge whenever you want. Maintain power is beneficial for extending battery life.
3. If the fan is not used for long time, please fully charge the battery and remove it from the fan, store in cool and dry place.
4. Fan blades will be at high-speed rotation while working. Don't put anything into the fan, otherwise, it may be serious damaged.
5. Don't use battery when the surrounding temperature is over 60 degrees centigrade. Don't pinch or disassemble the battery. Otherwise, it will lead to environmental pollution or explosion.
6. To ensure the performance and service life of the product, please use our company specified accessories.
